EDUCATION

VIT Bhopal University <i>B.Tech in Computer Science specialization in Cloud Computing and Automation</i>	Sept 2023 – Ongoing 8.83/10
St. Joseph's Convent Sr. Sec. School, Sagar (CBSE) <i>AISSE</i>	June 2021– May 2023 7.88/10
St. Joseph's Convent Sr. Sec. School, Sagar (CBSE) <i>AISSE</i>	April 2020– May 2021 9.2/10

TECHNICAL SKILLS

Programming Languages: Java (Proficient), Python, JavaScript

Libraries & Tools: NumPy, Pandas, Scikit-learn, GitHub, ReactJS, Node.js, Express.js, Tailwind CSS, SQL, MongoDB, Power BI, AWS, Docker, NoSQL

EXPERIENCE

Data Analyst Intern <i>Null Class</i>	Jan 2026 – Feb 2026 Remote
---	-------------------------------

Analyzed real-world datasets using data analysis and statistical techniques to identify trends, patterns and anomalies
Performed data cleaning, preprocessing and exploratory data analysis to improve data quality and extract actionable insights

PROJECTS

StudentSathi – A One-Stop Digital Guide for Student Empowerment <i>ReactJS, Node.js, Express.js, MongoDB, CSS, Tailwind</i> - Engineered a full-stack MERN application to simplify students' access to government welfare schemes, scholarships, educational resources and essential document service. - Developed secure REST APIs and integrated MongoDB for efficient CRUD operations and content management. - Implemented dedicated modules for Government Schemes, Document Assistance, Skill Development, Certificate Guidance and Student Support	Nov 2025 – Jan 2026 GitHub Repository
Hybrid Ensemble Model for Enhanced Cancer Cell Classification <i>Python, Scikit- Learn, OpenCV, Pandas, Matplotlib</i> Developed a machine learning system to classify cancerous cells and non-cancerous cells from medical images using ensemble learning techniques - Preprocessed image datasets using OpenCV to improve model performance and classification accuracy. - Evaluated model performance using standard classification metrics and visualized results with Pandas and Matplotlib	Jan 2025 – April 2025 GitHub Repository
My Meal Mate- Personalized Meal Recommendation <i>Python, Pandas, NumPy, Scikit – Learn, HTML, CSS</i> - Developed a personalized meal recommendation system based on user preferences, nutritional requirements and dietary restrictions - Built a structured nutritional dataset and implemented recommendation algorithm using Python and Scikit-learn	Sept 2024 – Dec 2024 GitHub Repository

CERTIFICATIONS

AWS Solution Architect Virtual Job Simulation | NPTEL Internet of Things | Computer Networks |
AWS Educate Introduction to Generative AI | NPTEL Cloud Computing and Distributed Systems |
ServiceNow University – Virtual Internship Program
