Education

Vellore Institute of Technology September 2023 – May 2027
B.Tech in Computer Science – Specialization in Cloud Computing and Automation *CGPA: 8.81/10*

St. Joseph's Convent Sr. Sec. School, Sagar, Madhya Pradesh March 2022 – May 2023
All India Senior School Certificate Examination *CGPA: 7.88/10*

St. Joseph's Convent Sr. Sec. School, Sagar, Madhya Pradesh March 2020 – June 2021
All India Secondary School Examination *CGPA: 9.2/10*

Experience

MPOnline Limited (Govt. of Madhya Pradesh & TCS Joint Venture) 20 May 2026 – 31 Aug 2026
Software Engineering & Operations Intern *Remote*

- Designed and delivered scalable backend modules and REST APIs capable of handling high-volume operational workflows under Agile environments, driving features from conception to production.
- Collaborated in a 7-member team to map logistics workflows and build an AI-Powered Smart Logistics System; translated field operational requirements into real-time tracking features using ASP.NET Core and SignalR.
- Automated fragmented operational workflows by integrating generative AI and n8n automation pipelines, eliminating manual bottlenecks for internal team tasks.

Technical Skills

Cloud & DevOps: AWS, Terraform, Prometheus, Git, GitHub
Languages & Frameworks: Node.js, Express.js, ReactJS, Python, FastAPI, ASP.NET Core, C#, REST APIs
Databases & Tools: MongoDB, OpenAI API, SignalR, n8n, Tailwind CSS

Projects

AI Incident & Log Analysis Assistant

Python, FastAPI, OpenAI API *github.com/THOMAS-SARAH/exception_analyzer*

- Shipped a live operational microservice that processes messy system logs to automatically generate structured, actionable Root-Cause Analysis (RCA) reports; optimized microservice response times by integrating asynchronous task queues and caching patterns.
- Designed the tool to act as a force multiplier for technical operations teams, turning confusing system telemetry errors into clear, step-by-step remediation tasks.

AI-Driven Cloud Resource & Cost Optimizer

Prometheus, Terraform, AWS, FastAPI *github.com/THOMAS-SARAH/multi-region-aws-telemetry-pipeline*

- Built and deployed an active infrastructure pipeline that continuously monitors real-time CPU/memory utilization and flags complex system anomalies.
- Solved real-world cost inefficiencies by provisioning multi-region infrastructure via modular Terraform templates and building automated backend endpoints to self-optimize resource allocation.

StudentSathi – A One-Stop Digital Guide for Student Empowerment

ReactJS, Node.js, Express.js, MongoDB, Tailwind CSS *github.com/THOMAS-SARAH/StudentSathi*

- Architected and deployed a scalable RESTful API using Node.js and Express.js to power 5 core functional modules, processing structured student data streams.
- Designed robust MongoDB database schemas and aggregation pipelines to dynamically serve and filter over 20+ categories of documents, government schemes, and emergency data.
- Implemented secure backend data validation and error-handling middleware, improving API reliability and ensuring seamless integration with the ReactJS frontend.

Certifications and Extra-Curricular

Certifications: ServiceNow University Virtual Internship Program; NPTEL – Internet Of Things, Cloud Computing and Distributed Systems; AWS Educate – Introduction to Generative AI.

Extra-Curricular & Leadership:

- **Education Minister, School Council:** Coordinated student and faculty needs to propose educational initiatives to leadership.
- **Club Coordinator, E-Green Club:** Led progress reviews, resolved blockers, and executed community environmental initiatives.
