SUMMARY

Computer Science undergraduate specializing in Cloud Computing and Automation. Apply strong problem-solving and analytical skills to develop practical solutions for real-world challenges. Demonstrate the ability to learn new technologies quickly, collaborate effectively, and translate ideas into efficient, scalable applications.

EDUCATION

VIT Bhopal University

B.Tech in Computer Science – Specialization in Cloud Computing and Automation

Sept 2023 – May 2027

CGPA: 8.83/10

TECHNICAL SKILLS

Programming Languages: Java (Proficient), Python, JavaScript

Libraries & Tools: GitHub, ReactJS, Node.js, Express.js, Tailwind CSS, SQL, MongoDB, SQL, AWS, Docker, NumPy, Pandas, Scikit-Learn

PROJECTS

StudentSathi – A One-Stop Digital Guide for Student Empowerment

<https://shorturl.at/G80Ch>

ReactJS, Node.js, Express.js, MongoDB, CSS, Tailwind CSS

- **Engineered** a full-stack **MERN application** to centralize government schemes, scholarships, educational resources and student support services on a single platform.
- **Designed** REST APIs and integrated MongoDB for efficient CRUD operations and efficient content management across multiple modules.
- **Streamlined access** to student services by implementing responsive modules for Government Schemes, Document Assistance, Skill Development, Certificate Guidance, and Student Support.

My Meal Mate – Personalized Meal Recommendation

<https://shorturl.at/25dEG>

Python, Pandas, NumPy, Scikit-learn, HTML, CSS

- **Architected** a machine learning–based meal recommendation system that delivers personalized meal suggestions based on user preferences, nutritional requirements, and dietary restrictions.
- **Curated** and preprocessed a structured nutritional dataset using Pandas and NumPy, leveraging Scikit-learn to generate relevant recommendations.
- **Delivered** an intuitive web interface using HTML and CSS, enabling users to receive customized meal recommendations with enhanced usability.

Hybrid Ensemble Model for Enhanced Cancer Cell Classification

<https://shorturl.at/GZ9BM>

Python, Scikit-learn, OpenCV, Pandas, Matplotlib

- **Implemented** a hybrid ensemble learning model to classify cancerous and non-cancerous cells from medical images with improved prediction performance.
- **Optimized** medical image preprocessing and feature extraction using OpenCV to enhance classification accuracy.
- **Validated** model performance using standard evaluation metrics and **visualized** analytical insights through Pandas and Matplotlib.

INTERNSHIP

Data Analyst Intern

Jan 2026 – Feb 2026

Null Class

Remote

- Analyzed real-world datasets using data analysis and statistical techniques to identify trends, patterns, and anomalies.
- Performed data cleaning, preprocessing, and exploratory data analysis to improve data quality and extract actionable insights.

OTHERS

Certifications: ServiceNow University – Virtual Internship Program

Languages: English(Proficient), Hindi(Proficient), Malayalam(Native), Japanese(Beginner)
