EDUCATION

Vellore Institute of Technology (Full-Time) Sept 2023 – Ongoing
B.Tech in Computer Science – Specialization in Cloud Computing and Automation *CGPA: 8.81/10*

St. Joseph's Convent Sr. Sec. School, Sagar, Madhya Pradesh (Full-Time) March 2022 – May 2023
All India Senior School Certificate Examination *CGPA: 7.88/10*

St. Joseph's Convent Sr. Sec. School, Sagar, Madhya Pradesh (Full-Time) March 2020 – June 2021
All India Secondary School Examination *CGPA: 9.2/10*

INTERNSHIP

MPOnline Limited 20 May 2026 – 31 Aug 2026
Software Engineering & AI Foundation Intern *Remote*

- Progressed from core to advanced software engineering: object-oriented design, data structures, DBMS, and database design on Microsoft SQL Server; applied Agile, SDLC/STLC, and unit/integration testing.
- Worked in a 7-member team to build **AI-Powered Smart Logistics & Supply Chain Intelligence System** in ASP.NET Core, with JWT-based role access, EF Core over SQL Server, and SignalR for real-time delivery tracking.
- Explored AI/ML paradigms, AI agents, and Retrieval-Augmented Generation (RAG); integrated automated backend workflows using n8n.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C#

Libraries & Tools: Spring Boot, Spring, ASP.NET Core, ReactJS, Node.js, Express.js, Tailwind CSS, SQL, SQL Server, MongoDB, AWS, n8n, NumPy, Pandas, Scikit-Learn, OpenCV, Git, GitHub

Core Subjects: Data Structures and Algorithms, Operating Systems, Computer Networks, Theory of Computation and Compiler Design, Cloud and AWS Foundamentals

PROJECTS

Task Management REST API
Java, Spring Boot, Spring Data JPA, Hibernate, H2, Maven *github.com/THOMAS-SARAH/Task_Manager*

- Developed a full-stack CRUD REST API using Spring Boot and Spring Data JPA, implementing 5 RESTful endpoints for task creation, retrieval, updates, and deletion with a layered Controller-Service-Repository architecture.
- Designed a normalized data model with JPA entity mapping and implemented server-side validation using Bean Validation (`@NotBlank`, `@Valid`) to enforce data integrity.

StudentSathi – A One-Stop Digital Guide for Student Empowerment
ReactJS, Node.js, Express.js, CSS, Tailwind CSS *github.com/THOMAS-SARAH/StudentSathi*

- Designed and developed the frontend UI for a full-stack MERN platform spanning 5 core modules: ID & Document Help, Government Schemes Hub, Skill & Internship Support, APAAR & Results, and Emergency Help & Support.
- Integrated frontend components with REST API endpoints to enable dynamic rendering of 20+ categorized information types including documents, certificates, schemes, and helplines fetched from MongoDB.

Hybrid Ensemble Model for Enhanced Cancer Cell Classification
Python, Scikit-Learn, OpenCV, Pandas, Matplotlib *github.com/THOMAS-SARAH/CANCER_CELL_DETECTION*

- Optimized image preprocessing and feature extraction pipelines using OpenCV, improving model input quality and boosting overall prediction reliability.
- Evaluated model performance using accuracy, AUC, and standard classification metrics, visualizing comparative results with Pandas and Matplotlib to support model selection and validation.

CERTIFICATIONS AND EXTRA-CURRICULAR

Certifications: ServiceNow University – Virtual Internship Program; NPTEL – Internet Of Things, Cloud Computing and Distributed Systems; AWS Educate – Introduction to Generative AI

Extra Curriculars: Education Minister in School Council; Best Girl Student of my Batch 2022-23; Club Coordinator of E-Green Club
