EDUCATION

Vellore Institute of Technology September 2023 – May 2027
B.Tech in Computer Science - Specialization in Cloud Computing and Automation CGPA: 8.81/10

St. Joseph's Convent Sr. Sec. School, Sagar, Madhya Pradesh March 2022 – May 2023
All India Senior School Certificate Examination CGPA: 7.88/10

St. Joseph's Convent Sr. Sec. School, Sagar, Madhya Pradesh March 2020 – June 2021
All India Secondary School Examination CGPA: 9.2/10

TECHNICAL SKILLS

- **Cloud & DevOps:** AWS (Lambda, S3, API Gateway, EC2, IAM, CloudWatch), Microsoft Azure, Docker, Docker Compose, Prometheus, Terraform, CI/CD (GitHub Actions), Git, GitHub, Boto3 (AWS SDK)
- **Languages & Frameworks:** Java, Python, JavaScript/Node.js, ReactJS, Express.js, FastAPI, REST APIs, HTML/CSS, Tailwind CSS, Linux/Bash
- **Databases & Tools:** MongoDB, SQL Server

PROJECTS

Serverless Multi-Tenant Configuration Processor github.com/THOMAS-SARAH/aws-serverless-config-processor
AWS Lambda, AWS S3, AWS API Gateway, Python (Boto3), AWS IAM

- Engineered a scalable, event-driven serverless microservice using AWS Lambda and Python (Boto3) to automate the processing and persistence of multi-tenant SaaS configuration files into AWS S3.
- Integrated AWS API Gateway HTTP endpoints with custom execution roles to secure stateless event routing and bucket write operations.
- Implemented dynamic storage partitioning and structured JSON response formatting to streamline automated tenant data management.

Containerized SaaS System Health Monitor github.com/THOMAS-SARAH/docker_health_monitor
Docker, Docker Compose, FastAPI, Python, REST APIs, Git, GitHub

- Designed and containerized a robust REST microservice using FastAPI for monitoring system availability, environment constraints, and performance metrics.
- Authored production-ready Dockerfiles and Docker Compose files to manage container networking, port mapping, and dynamic environment variable injections.
- Isolated execution environments to guarantee consistent, zero-dependency deployment and testing cycles across local and cloud environments.

AI-Driven Cloud Resource & Cost Optimizer github.com/THOMAS-SARAH/multi-region-aws-telemetry-pipeline
Prometheus, Node Exporter, Terraform, AWS, Linux/Bash

- Engineered a real-time infrastructure telemetry pipeline using Prometheus and Node Exporter to monitor system metrics, CPU/memory utilization, and workload health across cloud instances.
- Integrated Prometheus scraping endpoints with a FastAPI backend to ingest live telemetry data for automated rule-based resource optimization and anomaly detection.
- Provisioned multi-region cloud infrastructure using modular Terraform templates and built a traffic and failure simulation framework to stress-test system monitoring workflows.

CERTIFICATIONS AND EXTRA-CURRICULAR

Certifications

- Microsoft Azure Fundamentals (AZ-900)
- ServiceNow University - Virtual Internship Program
- NPTEL - Internet Of Things, Cloud Computing and Distributed Systems
- AWS Educate - Introduction to Generative AI

Extra Curriculars

- Education Minister in School Council
- Best Girl Student of my Batch 2022-23
- Club Coordinator of E-Green Club
