Education

Vellore Institute of Technology September 2023 – May 2027
B.Tech in Computer Science – Specialization in Cloud Computing and Automation *CGPA: 8.81/10*

St. Joseph's Convent Sr. Sec. School, Sagar, Madhya Pradesh

- All India Senior School Certificate Examination (March 2022 – May 2023) *CGPA: 7.88/10*
- All India Secondary School Examination (March 2020 – June 2021) *CGPA: 9.2/10*

Technical Skills

Programming & Analytics: Python (Pandas, Matplotlib), SQL, Java, C#, Linux/Bash, REST APIs
Databases & Data Tools: Microsoft SQL Server, MongoDB, EF Core, ETL Concepts, Excel, JSON Data Processing
Cloud & Infrastructure: AWS (S3, Lambda, API Gateway, CloudWatch), Docker, Terraform, CI/CD (GitHub Actions), Git, GitHub
Research & Systems: Data Collection, Database Querying, Data Cleansing, Technical Research, Data Pipelines

Experience

MPOnline Limited (Govt. of Madhya Pradesh & TCS Joint Venture) 20 May 2026 – 31 Aug 2026
Software Engineering & Data Operations Intern *Remote*

- Collaborated within a cross-functional 7-member Agile team to design structured database architectures, conduct technical research, and optimize data extraction pipelines.
- Executed data collection, database querying, and data cleansing tasks using EF Core and Microsoft SQL Server to maintain high data integrity.
- Assisted in writing and optimizing complex SQL queries, database migrations, and data validation rules to streamline backend data flows.
- Supported automated backend workflows, telemetry data ingestion, and system integration tasks to ensure reliable data processing and real-time tracking.

Projects

Log Processing & Data Analysis Assistant github.com/THOMAS-SARAH/exception_analyzer
Tools: Python, FastAPI, Pandas, JSON Parsing

- Developed a RESTful data processing microservice using Python and FastAPI to clean, parse, and analyze complex server log traces.
- Automated data transformation workflows to extract key error metrics and generate structured diagnostic reports for operations teams.

Serverless SaaS Configuration Data Processor github.com/THOMAS-SARAH/aws-serverless-config-processor
Tools: AWS Lambda, S3, API Gateway, Python (Boto3)

- Built an event-driven serverless data pipeline to ingest, validate, and safely persist multi-tenant SaaS configuration datasets into AWS S3.
- Configured dynamic storage partitioning and structured JSON data formatting to achieve automated tenant data management.

Cloud Infrastructure Telemetry Pipeline github.com/THOMAS-SARAH/multi-region-aws-telemetry-pipeline
Tools: Prometheus, Node Exporter, Terraform, AWS, Python

- Deployed a real-time telemetry data pipeline to collect, aggregate, and monitor system performance metrics (CPU/Memory utilization).
- Integrated backend API endpoints to process metric streams and assist in anomaly identification and system resource optimization.

Certifications and Extra-Curricular

Certifications: Coursera Machine Learning; AWS Solutions Architecture Virtual Job Simulation; MPOnline Advanced Software Engineering Certification; ServiceNow University; NPTEL – Internet of Things & Cloud Computing; Ubuntu Linux Training; Coursera – Computer Networks.

Extra-Curriculars: Education Minister in School Council; Best Girl Student of Batch 2022-23; Club Coordinator of E-Green Club.
